# A socio-ecological approach to tackle SGBV among adolescents in Kinshasa

The case of *Bien Grandir Plus!*

*project implemented by SCI & funded by the Government of Canada*

# Socio-ecological framework

# 1) Raising awareness around SGBV

- To reduce the vulnerability of adolescent girls to SGBV
- To enhance capacity to make informed decisions and to protect themselves
- To strengthen organisation and protection structures in responding to adolescents needs and SGBV survivors
- Specific training modules on SGBV and positive gender norms for teachers to address potential gender bias in teaching practices and classroom management and also specifically address the issue of SGBV

## 2) SGBV response in health services

- Improving the SGBV response in public and private health facilities
- Enhancing health providers' skills (gender-sensitive adolescent friendly clinical management of SGBV)
- Mapping of SGBV services & strengthen referral system

### 3) enabling environment for adolescent girls to make decisions on and exercise their rights to SRH and protection from SGBV

- Community level: SGBV report mechanisms strengthened in communities
- To ensure that SRHR of adolescent girls remains a priority on the political agenda, CBOs will be trained on coalition work and advocacy
- Advocacy activities at the government, CBO levels, etc.

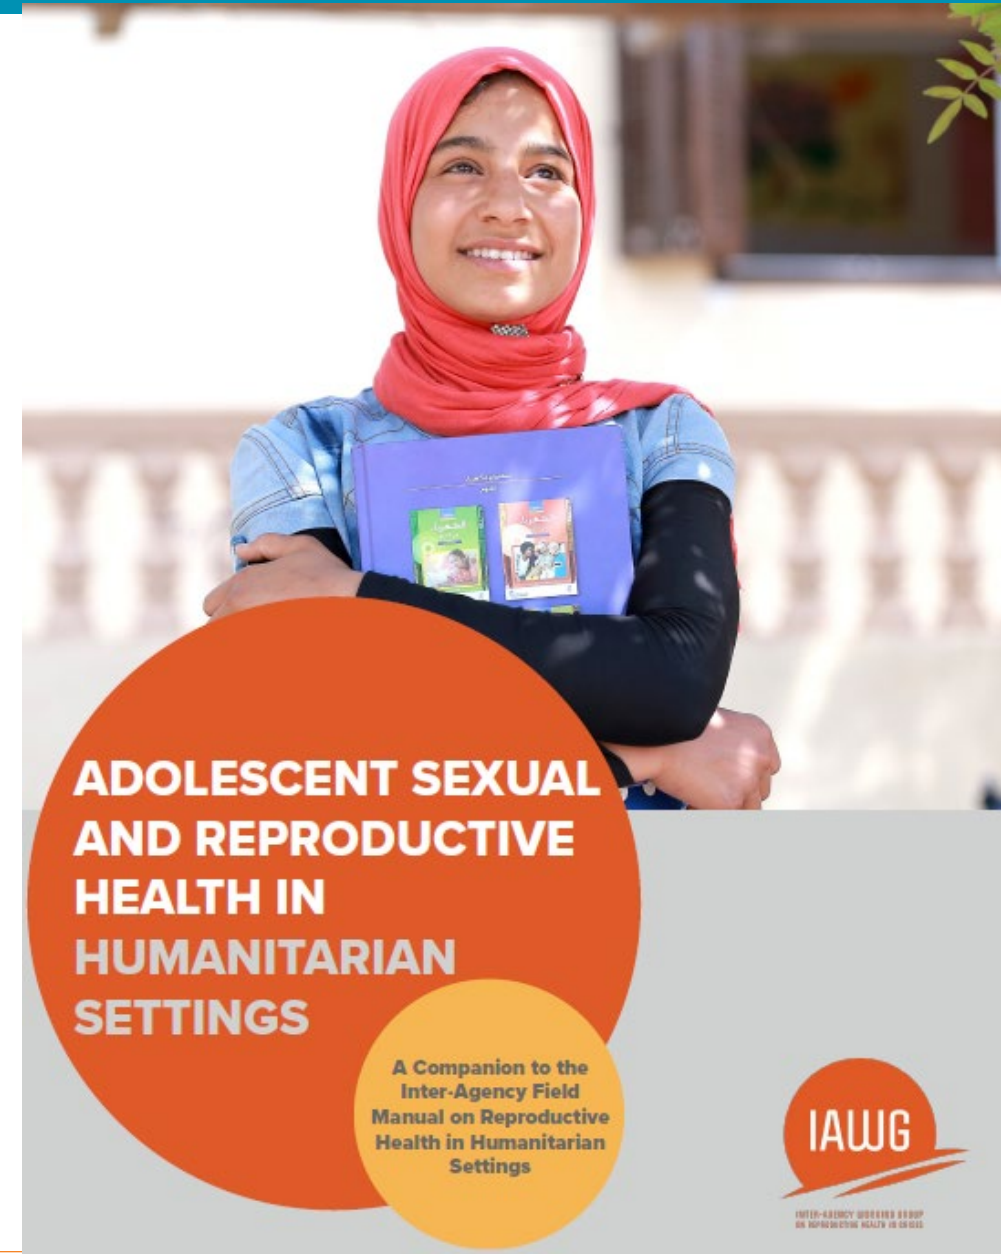

---

## Addressing root causes of SGBV

# ASRH Inter-Agency Efforts

- IAWG ASRH Sub-Working Group
- Revision of ASRH Toolkit for Humanitarian Settings
- Very Young Adolescent Sexual & Reproductive Health and Gender Program Design Guide
